Week 2 – Lab

1. Create an XML document that represents and structures the content of the pets.txt file (available on Moodle). The tags in the XML document must comply with the names in the table below.

Tag/Attribute Name	Description
Pets	Root element
Pet	Pet
PetID	Must be an attribute of the element Pet
Name	Name
Category	Category
Breed	Breed
DateAdopted	DateAdopted
Gender	Gender
Registered	Registered
Color	Color
ListPrice	ListPrice

2. Associate the pets.css file (available on Moodle) to the XML file created by adding the processing instruction below in the XML file

   <?xml-stylesheet type="text/css" href="pets.css" ?>

3. Place the pets.css and the XML document created in the same directory and open the XML document in a browser
