Week II – Lab 2: XML based standards

Search for the following XML based standards and create at least one example to understand their usage:

- **SVG (Scalable Vector Graphics)**: SVG is a standard for describing two-dimensional vector graphics.
- **MathML (Mathematical Markup Language)**: MathML is used to represent mathematical notations on web pages.
- **Dublin Core**: Dublin Core provides metadata elements for describing resources on the web.
- **RSS (Really Simple Syndication)**: RSS is a format for publishing frequently updated content.
- **ATOM**: ATOM is used for publishing and subscribing to content feeds.
